Term	Definition
ad hoc requests	Also known as one-off requests; informal requests that are not a standard part of an individual's workload
ask	Questions from leadership that frame the way an individual will construct and use data to provide answers
business rules	Definitions and processes that a business follows in its operations
dashboards	Visual and interactive expressions of data
noise	Unnecessary information in a data set that gets in the way of analysis
query	A statement created with a tool that can answer a question with data
select queries	Queries that select data from tables, with the tables defined as just the data an individual needs to accomplish a given task
